MARCH FORWARD

WE BOTH AIM TO BE AGILE

That's why we fully equip ourselves to quickly deliver the communication infrastructure and connectivity that you need to maintain your speed of command and remain nimble in battle. Agility is what allows us to confidently stand accountable for every component of your network, ensuring that it runs uninterrupted, remains integratable and features the flexibility, security and speed you need for a faster and stronger networked force – with improved information sharing, collaboration and situational awareness; greater sustainability of forces, speed of command and ready-access for global mobility and rapid response across the GC.

From the core to the edge, anytime, anywhere, Segovia keeps you agile.

Visit www.segoviaip.com to download your FREE Segovia Solutions for Defense Kit.

Segovia features a suite of end-to-end global communication solutions, offered through a world-wide network of integrated and scalable, custom-fit communication hardware and services. Our customers trust us for our fully-managed, secure, global, end-to-end network and technical support, Segovia remains a value-added partner of the defense community. 99.9% network availability, and 24/7/365 U.S.-based network and technical support.

OUR MILITARY STRATEGY

WE BOTH AIM TO BE PROFICIENT

That's what drives our one-stop, defense-centric managed network approach so that you are fully able to meet all of your communication needs. Through an integrated set of network solutions, including GSA Schedule 70 satellite hardware, engineering and technology services, transported bandwidth and fully-managed subscription services, we can support you with complete global connectivity – mobile or fixed, over land, sea or air. You can expect expertly engineered and proven system design backed by full information assurance, to bring you the secure computing power you need to stay focused on your skill and keep your eye on the mission.

From the core to the edge, anytime, anywhere, Segovia keeps your plan in scope.

ENLIST OUR TROUPE

WE BOTH AIM TO BE ACCESSIBLE

That's why we make sure that our people, tools, processes and expertise come together to give you secure, global satellite communications with sound network operability. From our PM-certified program managers, to our dedicated U.S.-based technical support and network operations, we remain on-call and vigilant to ensure your access to mission-critical data and that every network device is always connected. Our former-military systems, 86 IP and IT engineers combine forces to bring you deployable field support, along with a unique understanding and intuitive ability to meet all of your communication needs.

From the core to the edge, anytime, anywhere, Segovia keeps you wholly-supported.

UNIFORM SERVICE

WE BOTH AIM TO BE DEPENDABLE

That's why our satellite communications are backed by 24/7/365 technical and network operations management support so that your network remains steadfast for your command and warfighters. Through our state-of-the-art global Multi-protocol Label Switched (MPLS) network and Segovia's Global Management System (GOMS), we ensure reliable, rapid and secure access to mission-critical information at all times, with core capabilities and environmental statistics for full situational awareness accessibility from stateside to your side.

From the core to the edge, anytime, anywhere, Segovia keeps you connected.
