**Tribridge Solution One-Sheet:  
PORT AUTHORITIES**

**TRIBRIDGE PORT AUTHORITY ENTERPRISE SOLUTION**

A vital link for getting goods to U.S. consumers and transporting exported products, port authorities and seaports are critical to sustaining the economy and maintaining healthy trade.

Improving security, streamlining port operations and maximizing overall productivity require adaptable technology solutions and an experienced consulting partner.

**Solve Port Management Challenges With Proven Technology**

With a large list of public sector customers and proven success with port authorities, Tribridge is the partner you can count on to deliver cost-effective financial, logistics, document management, analytics, relationship management and IT infrastructure and security solutions.

Our Port Authority Enterprise Solution fits the way your port does business – featuring customer reporting requirements specific to your region or state – and allows you to make more informed business and policy decisions.

- Strengthen maintenance of all assets from buildings to equipment
- Increase accountability in financial management and streamline processes
- Improve relationships with key business and customer contacts
- Simplify human resource management, including employee self-service and benefits management

Our award-winning services and consultative approach, coupled with a dedicated team averaging 15 years experience, support a strong track-record of implementing successful technology solutions for our customers, allowing them to solve critical business challenges and achieve optimal operational performance.

**Tribridge Solutions Series:  
PROFESSIONAL SERVICES**

**Microsoft-based Automation Solution for Professional Services**

The pressure of winning new clients doesn't end at the presentation. Professional Services Organizations are constantly faced with the pressure to maximize the use of their primary assets: Knowledge, Experience and People. They need the tools to match their organizational challenges of adapting to their client's financial and project infrastructure, to be able to create and manage complex budgets, reconcile budget and change control in real time, and measure profitability at multiple levels.

Here and more, Professional Services Organizations are turning to more efficient business management solutions to better face unrelenting demands to improve project based services.

**Solve Professional Services Organization Challenges With Proven Technology**

Tribridge delivers cost-effective, comprehensive business management solutions that Professional Services Organizations can trust to address and solve critical business challenges. Our Professional Services Automation solution not only improves business management processes, resource management and service delivery, but also leverages existing infrastructure investment, while accommodating future demands of your organization.

Our end-to-end solution allows management to:

- Proactively manage projects
- Improve resource utilization
- Streamline processes across the project services life cycle
- Quickly access comprehensive project profitability and performance data
- Share more accurate, centralized information
- Develop more profitable customer relationships

Our award-winning services and consultative approach, coupled with a dedicated team averaging 15 years experience, support a strong track record of implementing successful technology solutions for our customers, allowing them to achieve optimal operational performance.
